| OLVG, Amsterdam, NL | 1 | 1 | 5.9 |
| Catharinaziekenhuis, Eindhoven, NL | 0 | 0 | 1.8 |

Data Entry: Adverse events and Arrhythmia Episodes

When entering an adverse event / secondary endpoint please do this via a follow up page. Do not use 'add a report' on the tab 'reports'.

The screenshot shows a navigation bar with 'Study', 'Reports', 'Monitoring', and 'Randomization'. Below it, a blue header reads 'All reports'. There are several filter dropdowns: 'Filter by report type:' (Select report type to filter), 'Filter by report:' (Select report to filter), 'Filter by status:' (Unarchived), 'Filter by name:' (empty text box), and 'Filter by phase:' (Select phase to filter). A red prohibition sign is overlaid on the 'Add report' button.

Please note that ICD related complications that require invasive intervention are a secondary endpoint and should therefore be entered in the eCRF as well.
